## Let Us Append E-mail Addresses to your Customer and Prospect Database

Ultra sophisticated software now enables you to receive appended e-mail addresses at a match rate never before available.

# Now Reach Your Customers and Prospects Via E-mail

The growing need to market on the Internet is apparent, especially in light of the increasing cost of traditional direct mailing.

Brick and mortar companies need an efficient means of keeping costs down and profits up. What better way to acquire E-mail addresses than to append current permission based e-mail information?

E-mail appending is matching an individual's unique name and postal address with other postal lists that also contain E-mail addresses. Our database is constantly refreshed with the most current E-mail addresses. Once appended, a permission request program is created that meets your specific requirements and industry standards to Opt-in each individual.

Currently the E-mail match quality is becoming better and better for both Business-to-Business and Consumer E-mail List appending. This provides you and your clients a reliable way to acquire 10% to 25% of your postal database with the most current and deliverable permission granted E-mail addresses.
